DETAILED ACTION***Response to Arguments***

Applicant's arguments filed on June 17th, 2004 have been fully considered but they are not persuasive. In reference to claims 1 through 6 and 12 the applicant argues that Bonutti's invention is a tool for removing percutaneous tissue not for directing bone replacement material.

It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

The intended use statements are not given any patentable weight in this instance for example "for directing bone replacement material into a fill space".

Bonutti also states that the opening or closing of the tube is simply a matter of design choice since it depends on where the invention is going to be used (Refer to column 7 lines 55-67).

In reference to claims 7 through 11, the examiner believes that claims 7 through 11 read on figures 9 through 13 and therefore are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP section 821.03.

In conclusion claims 1 through 6 and 12 are still rejected under the previous office action dating back to July 8th, 2003.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3743

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 through 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bonutti US Patent No. 5,577,517.

Bonutti discloses the applicant's invention as claimed with the exception of stating that at least one deflector opening has a length of between about $1 \frac{1}{2}$ to 3 D, where D is the internal diameter of the tube.

As stated in Bonutti (refer to column 7 lines 55-67), the configuration of a cutting tip (length of the deflector) is a design choice within the skill of the art. The length of the deflector also depends on where the invention is going to be applied. The goals are to be met are to obtain proper cutting and suction capabilities are achieved.

It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

The intended use statements are not given any patentable weight in this instance for example "for directing bone replacement material into a fill space".

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3743

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
